DISPLAY ADS

It is an advertiser's responsibility to provide a display ad that's ready to print in either PDF, .doc, .jpg, .gif, .tif, or .png format.

Creating your display ad from scratch? Use standard Bird's Eye widths, **2.4 inches, 3.7 inches, 5 inches, or 7.6 inches**. The ad's height is up to you.

But if you already have an ad graphic that doesn't conform to these exact widths, we can usually work around it.

Please remember that a display ad should be easy to read. Placing too many

words in too small a space results in tiny fonts that could frustrate readers rather than win their interest.

Display ads requested later than noon on Fridays for the next edition are only possible at the editor's discretion.

If your ad runs in two consecutive issues (a single-edition gap still counts as consecutive), then the second and all such recurring ads are discounted 10%.
